**OmniTRAX Energy Solutions Receives 2018 STEER Eagle Ford  
Excellence Award for Safety**

**DENVER** – OmniTRAX Energy Solutions (OES), a leading provider of comprehensive logistics services to the proppant supply chain and an affiliate of OmniTRAX, Inc, received the 2018 **Eagle Ford Excellence Award for Safety Performance**, presented by the South Texas Energy & Economic Roundtable, today at a ceremony today in San Antonio. Several OES team members were in attendance, including Scott Remington, Elena Saenz and Russell Huntington, and Remington accepted the award on behalf of the company and its employees.

The **Eagle Ford Excellence Award for Safety Performance** recognizes specific initiatives or products that have significantly reduced the risk to workers or members of the community in the Eagle Ford Shale region. It is given annually to a company working in or with the oil and gas industry in the Eagle Ford Shale region that demonstrates superior safety performance.

“The OmniTRAX Energy Solutions team is very proud to earn this award. We take safety extremely seriously, providing training and other resources to ensure that every one of our associates goes home in the same condition as when they arrived at work,” said Justin Renfro, President of OES.

“I want to thank our teams for their continued dedication and attention to safety. It isn’t by accident that we’ve been incident free at our terminals for two years. This is a team effort and we focus on keeping each other safe and running safe operations.”

In being presented with the award, OES was cited for its commitment to having a safety culture that permeates the organization and for its education programs that have long-

term results. The judges also recognized that OES Safety Action and Silica Exposure Control plans promote employee engagement and ensure team members have all the equipment required to do their jobs safely.

**About OmniTRAX Energy Solutions**

OmniTRAX Energy Solutions (OES) provides a comprehensive proppant delivery solution to customers in the most prominent frac sand areas and oil and gas basins in the U.S. OES delivers scalable, cost-cutting mine-to-wellhead supply chain services through its network of railroads and terminals servicing the Bakken, DJ, Eagle Ford and Permian basins and many of the largest mining areas.

**About OmniTRAX, Inc.**

As one of North America's largest private railroad and transportation management companies, OmniTRAX's core capabilities include providing management services to its affiliated railroad, port, intermodal and industrial switching operations. Through its affiliation with The Broe Group and its portfolio of managed companies, OmniTRAX also has the unique capability of offering specialized industrial development and real estate solutions, both on and off the rail network managed by OmniTRAX.
